

ABOUT THE INSTRUCTOR

Sergeant Huggins holds a Master's Degree in Forensic Science from Oklahoma State University and is an instructor in the Texas Forensic Science Academy at Texas A&M/TEEX. He is also a subject matter instructor in Biological Evidence, Bloodstain Pattern Analysis, and Shooting Incident Reconstruction in the Texas Ranger Advanced Crime Scene Investigation School. Sergeant Huggins is a 27 year veteran of DPS and has been a Texas Ranger Sergeant for thirteen years. He has been accepted in state court as an expert witness in bloodstain pattern analysis, death investigation, and shooting incident reconstruction. With over 4,800 hours of accredited training, his certifications include Master Peace Officer, Police Instructor, Polygraph Examiner (past), Forensic Hypnotist, Special Investigator, and Hostage Negotiator.

FORENSIC APPLICATIONS OF DNA EVIDENCE

ADVANCED INVESTIGATIVE TRAINING

FORENSIC ASSOCIATES

Discounted Early Registration

Limited Enrollment

AN INTERACTIVE WORKSHOP

This program is intended for law enforcement officers and crime scene investigators involved in the identification, collection and preservation of DNA evidence. The object of the program is to give law enforcement and other criminal justice professionals the information they need so critical pieces of evidence will be collected, fewer cases will be jeopardized by mishandled evidence, and more cases will be solved through the proper use of this technology. This information will enhance the participant's ability to make sound DNA evidence collection decisions. Participants will have the opportunity to apply newly acquired knowledge by working simulated crime scenes.

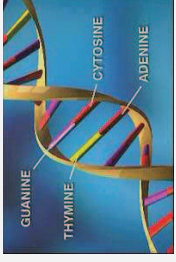

TCLEOSE CREDIT

This class is approved for 16 hours credit by the Texas Commission on Law Enforcement Officers Standards and Education.

SPONSORED BY:

This course is sponsored by the Texas City Law Enforcement Academy

FOR ADDITIONAL INFORMATION CALL
Jim Huggins at 936-348-8060

YOU WILL LEARN

Upon completion of this course participants will be able to:

- Recognize the types of crimes which provide DNA evidence
- Examine the DNA database and its uses
- Explain the use of CODIS for law enforcement purposes
- Describe proper collection techniques
- Identify proper packaging techniques
- Explain proper transport and chain of custody
- Define biohazards and safety procedures
- Explain the process of cold case testing
- Become familiar with DNA testing technologies
